Project title: HOSPITAL MANAGEMENT SYSTEM

Project Over view:

A hospital management system is an information system that manages the aspects of a hospital. This may include the administrative, financial, and medical processing. It is an integrated end-to-end Hospital Management System that provides relevant information across the hospital to support effective decision making for patient care, hospital administration and critical financial accounting, in a seamless flow. This program can look after Inpatients, OPD patients, records, database treatments, status illness etc. it also maintains their hospital info such as ward id, Doctor in Charge, Department administering etc! Not only has this it also looked after doctor and staff records.
